November 2018

Monthly Markets Report

November was a highly volatile month with a truce ending: the G20 meeting in Buenos Aires, Argentina, that saw the US and China agreeing on a 90 days delay on any new tariffs and trade barriers, pending a new round of negotiations. Although these news were welcome and came hand in hand with a commitment to a rules based international trade system, WTO is not out of the woods yet, as fresh political developments may steer further backlash even from traditional WTO and multilateral organizations supporters.

November has also been a moving month for Brexit and the UK, with EU agreeing to a divorce treaty that is proving hard to sell to the British public. Chances of no deal increase, as well as political instability and the fresh realization of a high economic impact to be paid over the exit. GBPUSD closed at 1.2752, EURUSD closed at 1.1320, USDCAD closed at 1.3289, USDJPY closed at 113.48 and USDAUD closed at 1.3678. November was somehow sideways until Brexit news unleashed fresh volatility over GBPUSD and related markets, causing some unexpected volatility to an otherwise traditionally smooth time of year.

Laurion Fund closed the month with a net result of -0.08%, slightly below its benchmark CSAIX, that closed November at 0.31% more compared to the previous month.
